**AWESOME PRODUCTS.
AMAZING CUSTOMER SERVICE.**

"The GroundHog LMS app is a one-stop-shop for an entire training package, and it's an awesome tool for safety professionals," We replaced our manual paperwork and spreadsheet matrix with LMS.

## Our Story

We believe that inexpensive Android and iPads, BLE and WiFi networks, AI, and an explosion of off-the-shelf products in telemetry systems **has made it easier for mines** of all types and sizes to gather data in ways not possible before. But that data continues to live in silos and is still analysed and reported in spreadsheets. We want to change that.

GroundHog's comprehensive portfolio of Production Optimisation and Safety solutions **combine software, hardware and cloud** to bring real-time visibility, analytics and AI to mines.

Mines worldwide use our Platform to digitise and streamline safety training and data management
